From Arnsdorf near Dresden, Saxony, Kirchhoff & Lehr delivers precise, cold-rolled sections worldwide.
The family-run company Kirchhoff & Lehr is one of the most cutting-edge producers of cold-rolled sections in Europe.

The company was founded in 1901 and produced its first sections as early as 1928. When the GDR became history in 1989, the company, which had been nationalised in the meantime, was reprivatised. In 1991, Tillmann Group took a share in the company. Following numerous expansions, production is carried out utilising eight modern roll-forming lines today.
Flexibility, speed and trusting cooperation – these are the qualities Kirchhoff & Lehr customers have relied on for decades.
The desired product specifications are processed using CAD and optimised for roll-forming technology in our in-house construction department.

The entire tool construction is carried out utilising up-to-date and compatible CAD software. Even urgent and complex demands can be met efficiently at any time due to Kirchhoff & Lehr’s own tool shop.
From 0.3 mm strip to 25 metre sections: Kirchhoff & Lehr produces sections in almost any dimension.
Kirchhoff & Lehr processes the following dimensions

- material thicknesses: 0.3 mm to 6.0 mm
- strip widths: 10 mm to 700 mm
- section heights: up to 140 mm
- section lengths: 50 mm to 25,000 mm

Eight roll-forming machines and a number of further processing systems allow our manufacturing department to react swiftly to customer demands and needs.

Our own cutting-edge tool shop is an important factor in ensuring that customer demands are met promptly. Through three-shift production our capabilities are further strengthened.

Kirchhoff & Lehr processes

- hot-rolled strip
- cold-rolled strip
- galvanised material
- stainless steel
- high-strength steel
- aluminium
- coated strip
Kirchhoff & Lehr also offers further processing and assembly options. Packaging and shipment can be arranged as well.
Roll-forming is where we are at home.

And we do much more than roll-forming. As a state-of-the-art supplier, assembling complete systems and welded subassemblies is another key element of our production range.
Quality is produced, checked and documented. Above all, quality is lived on a daily basis by more than 100 highly qualified and committed staff.
A large number of qualified employees have been working for Kirchhoff & Lehr for many years now.

This speaks for itself. As a training company offering apprenticeships in all department, Kirchhoff & Lehr has been giving young people opportunities for their career launch for decades. For Kirchhoff & Lehr, training is an investment into the future, so that product and service quality, when also supported through an integrated management system, can be safeguarded for the coming generation.
Kirchhoff & Lehr products from Arnsdorf are with us in all areas of life – often invisibly – and sometimes saving lives!
Sections and other products from Kirchhoff & Lehr often constitute an invisible part of a device or machine.

The reinforcement inside electrical cabinets, the car rocker panel, or the rear blind casing – almost everyone uses Kirchhoff & Lehr products on a daily basis.
A strong team developing goal-oriented solutions in collaboration with you.
