

Way Finding Solutions

About the Company

Since 1988 it has become a leader in the revolutionary production and sales of modular sign systems, based on aluminium profiles and synthetic parts.

The expertise of Triline® International constitutes a support to sales and technical teams all over the world in their daily activities.

Professional tools are available. Each equipment is put to use. Technical and commercial know-how, present within the organization Triline® International, is transferred to all sales offices worldwide by devoted teams.

Complete solutions for interior and exterior signage, from small door-signs over big synoptic panels to exterior signs.

All the product lines are marketed under the named own private label Triline® which already was introduced on the market and gained fame with the professional in the field of signage.

Development is a continuous process integrated in the company philosophy.

Way Finding Solutions

MANUFACTURER
OF SIGN SYSTEMS

Triline[®] *Way Finding Solutions*

Triline[®], the modular solution

Triline[®] offers you suitable answers to all your signage needs in a public, office as well as private environment. Triline[®] is synonymous to modularity, design and durability and is the resultant of research of many years and an intense product development.

Triline[®] combines functionality with design and gives an aesthetic surplus value to your architectural living and working space.

Triline[®] co-ordinates 7 basic product lines each having an own character and field of application, and also offer made-to-measure solutions.

Inspiring Design, solid solutions

Triline[®] doesn't leave you unmoved.

Wayfinding uplifted to functional architectural decoration. Modular systems and streamlined designs.

Triline[®] offers you unknown possibilities for your "building communications".

Standard issue or made-to-measure, the Triline[®] systems connect seamlessly to all your wishes and requirements.

Big or small project, simple or complex, choosing Triline[®] is choosing aesthetic durability. Triline[®] enhances your image and contributes to your professional presence.

Triline[®] doesn't leave anybody unmoved.

ur mission is to offer the market a high-quality, modular sign system.

Triline® International Ltd. is a professional partner, ready to satisfy the needs of customers, offering flexibility and assistance, through the research and use of specialized and skilled personnel, oriented towards quality.

Triline® offers you suitable answers to all your signage needs in a public as well as in a private environment thanks to modern, elegant and ingenious design.

Triline® selects materials and accessories of a superior quality, guaranteeing durability and stability of the product, and at the same time offers competitive prices on an international level.

This result is successfully accomplished after many years of study, research and experience in the field.

Katia Longo

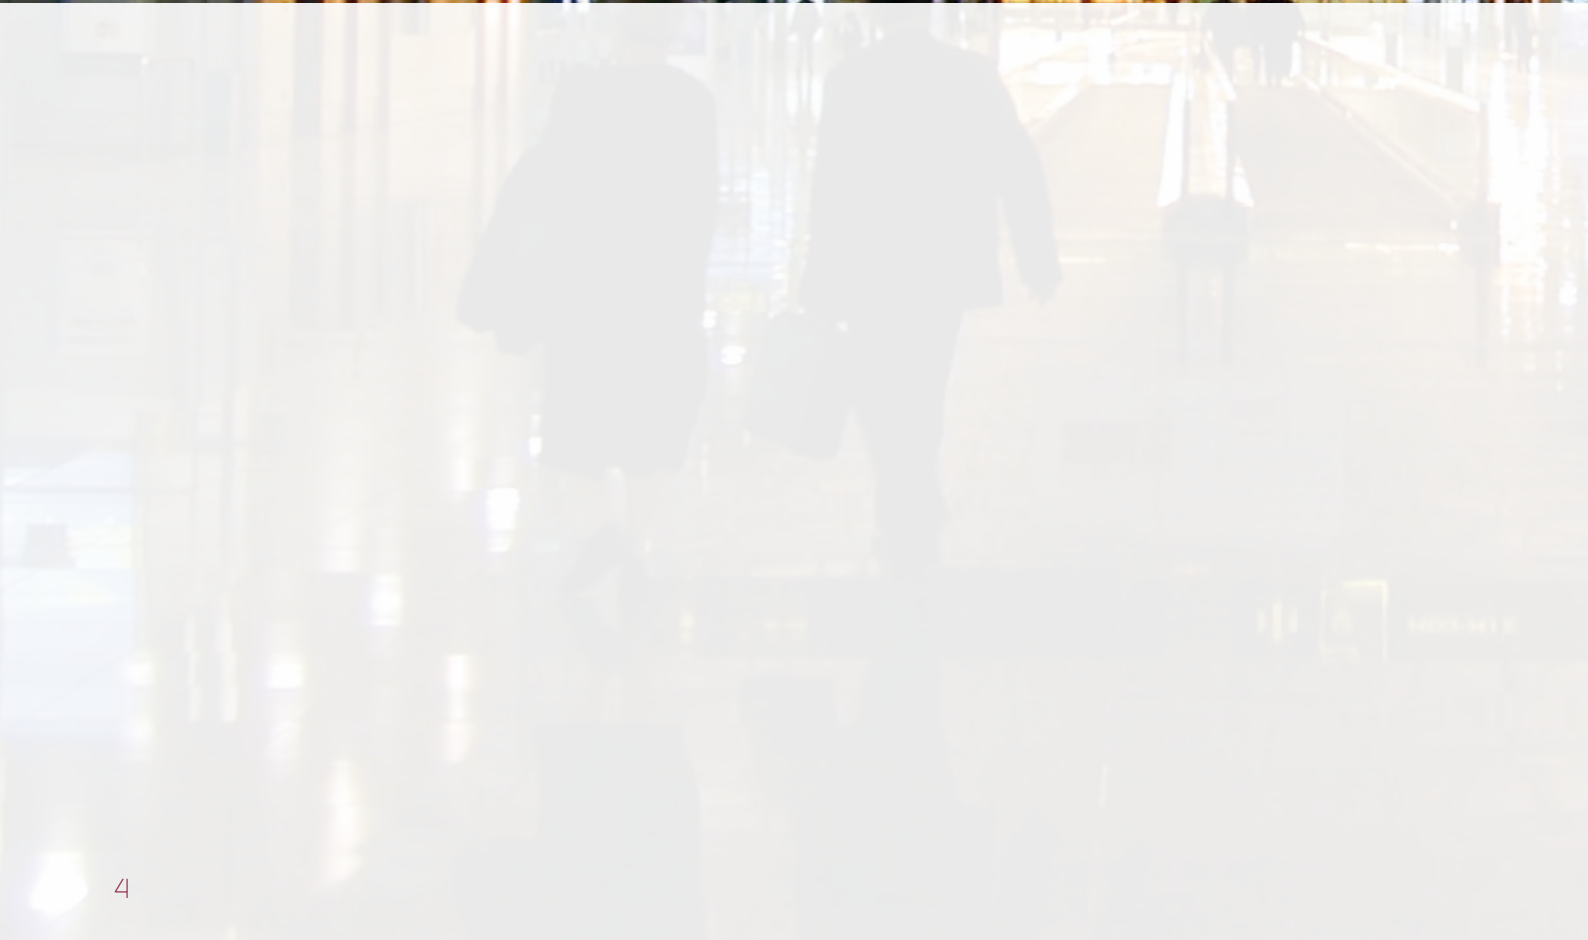

Marketing Manager

Triline® International

After an intensive research & development phase, the new modular aluminium signage system Triline® was launched on the international market. Owner and C.E.O. of the company, Erik Broos-Godts, created and developed Triline® out of his own professional insights with several systems designed earlier, and patented his inventions before introducing them to the signage market.

Triline® is a state of the art modular architectural signage system that not only has anti-theft/anti-vandalism features, but also offers amazing results in the field of timeless design and elaborated technical and application possibilities.

Triline[®] *Way Finding Solutions*

Professionals in the field such as project developers, (industrial) architects, interior designers, contractors and signmakers have already acknowledged and understood the technical advantages of Triline[®].

They noticed very soon that the concept behind these systems offers an inexhaustible versatility for creation of architectural building signage, synoptic panels, exterior signage (columns/totems) and illuminated signage. Triline[®] brings eye-catching total solutions with an amazing technical simplicity.

Moreover the systems remain price conscious without however making concessions to the quality.

Triline® made-to-measure signs

Next to the more current and standard dimensions of the Triline products, nearly every item can be made to your measure.

All manipulation such as sawing, lacquering, lettering, assembly and final control, are performed within the company.

Strict procedures guarantee a perfect quality assurance during all the stages of the manufacture and assembly process.

Made-to-measure work also allows to deviate from a standard product line and effecting prototype building in conformity with the directives and specifications of a tender of quantity survey at hand.

This flexibility grants you that extra certainty that we can provide a solution for all your signage needs.

Triline profiles allow the following applications: vinyl lettering, digital printing, engraving and Braille text.

Standard colours & finishes: mill finish and silver anodized

Please contact your local distributors for availability of colours.
